Diagram illustrating a 1D Lattice structure. The lattice consists of 16 sites. The first 8 sites are occupied by blue particles, and the last 8 sites are occupied by red particles. A blue line connects the 4th and 8th sites, and a red line connects the 12th and 16th sites. A central box contains the text "1D Lattice".

Four circular wood samples are arranged in a 2x2 grid. The top-left sample is a dark, rich brown with a smooth finish. The top-right sample is a light, pale yellow with a smooth finish. The bottom-left sample is a medium brown with a visible vertical wood grain and a smooth finish. The bottom-right sample is a reddish-brown with a visible vertical wood grain and a smooth finish. All samples are set against a light-colored, marbled background.
